

**Physics 152—Accelerated Physics II: Electricity, Magnetism, and Optics**  
**Homework Assignment #4**  
**Due Friday, September 27, 2024, 9:30 am**

## Mastering Physics

Do the on-line assignment “HW #04.”

For problems 24.10 and 24.12, you should read the corresponding examples in section 24.1 of the text. The problems themselves are quite straightforward, but it is worthwhile to read through and understand the corresponding background in the examples.

## Pencil-and-Paper Problems

There are no pencil and paper problems this week.

### Academic Honesty

Since there is no written work this week, there is no place for you to write down and acknowledge any collaborators. Nevertheless, the same basic principles of intellectual honesty apply. You may get help from others, but the work you ultimately turn in *as* your own should *be* your own.
